Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Sherman et al (6748709).

Figures 1-2 shows panels (23), clips (60'), panel perimeter (the L-shaped attached to part 40'), means for securing the clip to the walls (5'), moisture barrier (the part between the wall and the part 30'), a joint closure (80'), a sub-frame member (30').

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different panel attachment systems.
